New food resources and technologies to improve public health and food security (FOODRETEC)

PUBLISHED 02 MAR 2023 | LAST UPDATED 06 DEC 2023

Financial scheme: Joint transnational calls

Deadline: 21 April 2023, 00:00 CEST

Relevant thematic areas for this call:

Oceans, Health, Land-based food, the environment and bioresources

Target groups: Research organisations

Contact person: Mona Gravningen Rygh | Mat og bioøkonomi |
mgr@forskingsradet.no

The development of innovative food technologies and the use of new food ingredients will contribute to the production of safer, healthier, and more sustainable food.

The aim of this call is to build knowledge to succeed with a dietary shift towards a healthier and more sustainable diet.

Improved use of resources and designing new foods will be a driving force in a dietary shift. This call deals with topics such as food safety, nutrition, and consumer acceptance. It will focus on new food ingredients and new foods, both land-based and from the sea, and technologies. Important aspects to be addressed in this regard are safety, nutritional quality, digestibility, bioeconomic aspects, and consumer acceptance of new ingredients, food and framework conditions.
